AutoCAD Crack + Keygen For (LifeTime)

AutoCAD has been used by the construction, engineering, and architecture industries to create 2D drawings for decades. In 2016, AutoCAD was the world's number one selling CAD application for over 20 years in a row. NOTE: This page is not updated on a regular basis. Latest changes January 5, 2019 New features With this update, we're excited to announce a new look for the AutoCAD mobile app on iPhone and iPad. This update gives you an experience that's more convenient and consistent with the desktop app's new look and design, with larger images and a cleaner and more intuitive navigation and functionality. It also allows you to share drawings to Twitter and Facebook with the new file viewer, and provides the best user experience possible for viewing and editing with cloud-based technology. This update also brings improvements to the user interface and the experience with interactive tools, such as toolbars and the pencil and guidance tools. What's new? • The main page of the AutoCAD mobile app has a new look. • The thumbnails of the projects in the folder viewer are now bigger. • The folders list now scrolls up and down, instead of jumping in between folders. • The folders list has a cleaner look, with larger images and buttons, and a more intuitive design. • You can now share drawings from the app to Twitter and Facebook by selecting the share icon, and from the share menu, choosing Twitter or Facebook. • The user interface has been redesigned to be more consistent with the user experience in the desktop app. • The navigation experience has been improved. • The app now remembers your last view, even if you navigate away. • The drag and drop function of the toolbar has been improved. • The AutoCAD mobile app now displays the latest change count in the upper-right corner of the app. • The pencil tool and the black dots are now customizable. You can turn them on and off. • If you turn off the BlackDot switch on the right side of the App menu, the cursor turns white. • The pencil tool, when used with the Template on the App Menu, now applies the change to the currently selected object. • The pencil tool, when used with the Macros on the App Menu, now prompts the user to enter a description. • The black dot cursor now
