Rustler is a mod for the PC game Rustler by Hike n Ride Games. Rustler is a northbound city-based horse-carriage racing game. When Rustler came out on Xbox, the developers contacted us to make this game. We decided to make a new game called Cargo Man. When Rustler was released, the developers didn't want us to make a version because they already made Rustler. We decided to make this game and we decided to use the same engine and we can make Cargo Man with the same engine (Rustler or Cargo Man). There will be a new Cargo Man for PC, coming soon. About the Developer : Zentari is a game developer and 3D modder from Jakarta, Indonesia. We are indie studio, and made Rustler game and Cargo Man game. We are a small team and still developing games. We don't have a lot of budget, so we have to do all the game ourselves, and we are not professionals. Try Rustler & Cargo Man for FREE on Steam! chan Hi there, I'm just a casual player who likes to mod the Rustler and my playstyle is much different from the mods that have been made so far. I used Sanimax to make an underground map for the Rustler, like the one in the trailer. When I started I didn't think I'd make it this far. I will try to make a video every month, and hopefully I will have even more content than what I've seen so far of the mod so far. Rustler - Into The Wild Mod Map [HD] Welcome to the largest map on my channel. This is Rustler, a massive 66x40 map (4.5km²) based on the Rustler game by Hike

Game Source: Garrison: Archangel had been in development for nearly 7 years, with "Garrison" being expected to release in December of 2013. Due to a similar title released by another publisher, RE:CHARRED was asked to complete a remix, providing gameplay footage, assets, and additional music. The game became known as "Garrison: Archangel" when Richard Nicolas approached the developer as he was feeling more familiar with the game and its genre. He would then go on to complete the soundtrack for the game, which he released via his own website. Richard Nicolas is a German electronic musician and sound designer with a very distinctive style that draws comparisons to Rammstein. He is, however, more known for both his soundtracks and remixes. In the year 2000 he achieved worldwide fame with his track "Waiting" from the album "Paradise in the Park." He currently resides in Berlin, Germany with his mother. -- Richard Nicolas main page: With a heavy heart, the developer of this game has decided to discontinue its life in the steam market. However, we will be leaving the game's website and forums accessible as a thank you and a place of learning that it was once a part of. Heads up! What's new:

Phantom Breaker: Omnia (LOFI Remix) Soundtrack sounds like a game that was designed to be mental exercise. Everything just got the right pitch; I wasn't expecting for a game to make me so mesmerised that my mind be somewhere else. If you are interested in the app, you can download it from the App store. The idea of brain games was first introduced by the skullduggery by the Belgian scientist Israël Paul Broca in 1872. Broca stated that Broca's area of the brain controls parts of speech, logic, and the ability to speak. The method used to research this was brain death. Before death, it was determined that an individual's ability to communicate weakened. Ultimately, after death, it was discovered that Broca's area of the brain remained a part of the brain after the brain was dead. After the announcement by Paul Broca in 1872 there were little research into the matter or using the method to study brain functions. Since then the techniques have been used to study how the brain works. This idea has merged with Hilary Mantel's book, the Wolf Hall. In the book, it was revealed that Cromwell's brain was soured. He died suddenly. It was found that there was a small pinpoint of grey matter inside of Cromwell's brain, so brain aphasia was blamed on the area of his brain. On an autopsy, it was discovered Cromwell has stroke. The term brain game is one of the many brain games presented and there are many others. Brain games can be done in a lot of ways, however, most games are goal based. Afterwards, the motivation to keep playing grows. The motivation to play a brain game is to learn. Learning is the ultimate goal of all brain games, from beyond-challenging games like a brain puzzle to familiar games like Nintendo's Wii U, Super Smash Bros and ARK. Each game has its own purpose, however, it is up to the individual player to determine the purpose of the game. After that, the player has to determine which is best for him or her. The common element to all the games is that they made us challenge our brains. That's why we call a brain game with a challenge a brain game. In the video, I should make one thing clear. There is no copyright in the video.
