PSOProxy Product Key is a simple web server client program that works with the Gamecube browser. It serves the following files:

- * `pso_server.scm` - a program to read a Phantasy Star Online server's snapshot data.
- * `pso_client.scm` - a program to read a `pso_server` snapshot data file.
- * `pso_images.scm` - a program to copy a `pso_client` snapshot data file and convert it to a common image file format.
- * `pso_proxy.scm` - a script to change the `pso_server`'s server IP address, port, password and path. The screenshots are comprised of 2 parts: a screenshot of a `pso_client` snapshot file, and a screenshot of `pso_images` converting the `pso_client` snapshot to a standard image. These files are displayed in a different layout, as well as different sizes.
