------------- Badland Bandits - the most fun - and frustrating - game on planet earth! It is possible to play as single player, but we strongly advise you to team up with other players as you will be playing against enormous waves of enemies. Choose between Big Head, The Bull, The Horse, The Rat or the awesome Unicorn - join in the chaos and shoot at hordes of screaming brainies. You can choose to play either on land or water and enjoy the great arsenal of weapons you have. We hope you have as much fun playing Badland Bandits as we did creating it! Comments I cant believe no one has unlocked all the jobs yet, all the jobs are available in game no matter what version you play. All vehicles have "Official" and "Unofficial" variants. I think everyone should unlock all vehicle parts so you can choose your own vehicle/job to suit your needs. The "Heads" cars i'm talking about are re-entrable, its like the decker truck, the command vehicle or the dragon that drives around

About: In Skyrim, Castles and strongholds are magical structures that represent power as well as a home. They are the only building that is exclusive to the player. They are permanent and cannot be changed without equipping the Remove Enchantment spell to the exterior of a castle or stronghold. The castle size will increase until your Magicka runs low, but the castle will remain as a static object on the world map. Strongholds do not restore Magicka. I set out to rewrite the mod for the massive change to the landmass in 6.0. The first release was dedicated to a new interior design that would fill in the black spaces where the player would be. This included stone floors, plating, and interior trap doors. The next version I created could be cast from your holdings and would rotate the new design on a daily basis based on your direction of travel. In the past, Kingdom Builder was based on placing the first three buildings in town hall order with a special marker that represented the settlement. I changed this to allow the placement of buildings at just about any location and even be removed at any time by command. New Features Include: - 10 optional castle designs - 6 optional stronghold designs - Can be placed and moved at any location - Rotate Castle on the daily - Rotate Stronghold on the daily The map packs are free to use in the Steam version of Kingdom Builder. And the goal is to create it as a complete set of environment designs that can be used by anyone to create their own fantasy kingdoms to enjoy as they pass through.
