

SIGGRAPH 2018 Computational Geometry Course - QGIS Map Design. Determine which objects are in and out of a user defined polygon.Q: PHP escape string special chars in \$\_POST \$\_POST output: 'foo bar baz' How to escape those characters as \$\_POST input? I found this solution but it doesn't work. A: The php manual says PHP will escape special characters within the string, as well as within quotes, brackets and parentheses, unless you tell it not to with the escapeshellarg() function. so you have to use escapeshellarg() to escape them. A: There are two ways to do this: Use nl2br(), this is the "best" way: \$\_POST = array\_map(function(\$v) { return nl2br(\$v); }, \$\_POST); Use escapeshellarg(), this isn't as safe, but more human friendly: \$\_POST = array\_map(function(\$v) { return escapeshellarg(\$v); }, \$\_POST); This will also add double quotes around the whole \$\_POST array. Just for a change we thought we'd have a little fun with the Club President's cleavage. We have Kayla Danger clad in nothing but her sweet pink satin bra and panties, ready to do a little dancing for us when she's not in the president's chair. After Kayla has done her dance and rubbed a large cock on her round and smooth tits and then skilfully taken the whole thing in her mouth she decides to strip off in front of a crowded room, and after a tit-wank to the music and some saucy solos and duets, having Kayla strip to her bra-tops and panties we thought we would see if Miss Danger could do the same. After long teasing with her hand and some serious fingering, bringing herself to a peak of excitement in the middle of the auditorium, with the music pounding in her ears and the crowd cheering her on we thought we would tempt Miss Danger to take off her clothes and show us her bits, but she wasn't having any of that! Caught twitching to come we thought we would have to call it a day. But no more! We have some new tricks we thought we would try, now Miss
